HOSPITAL OPERATIONS

a clear view of patient flow, service efficiency, departmental performance, and trends across the organization.

- OVERVIEW
- PATIENT EXPERIENCE
- PATIENT ANALYSIS
- FINANACIAL PERFORMANCE

KEY INSIGHTS

Department Workload:
The Pediatrics department is the most busy with 10247 visits

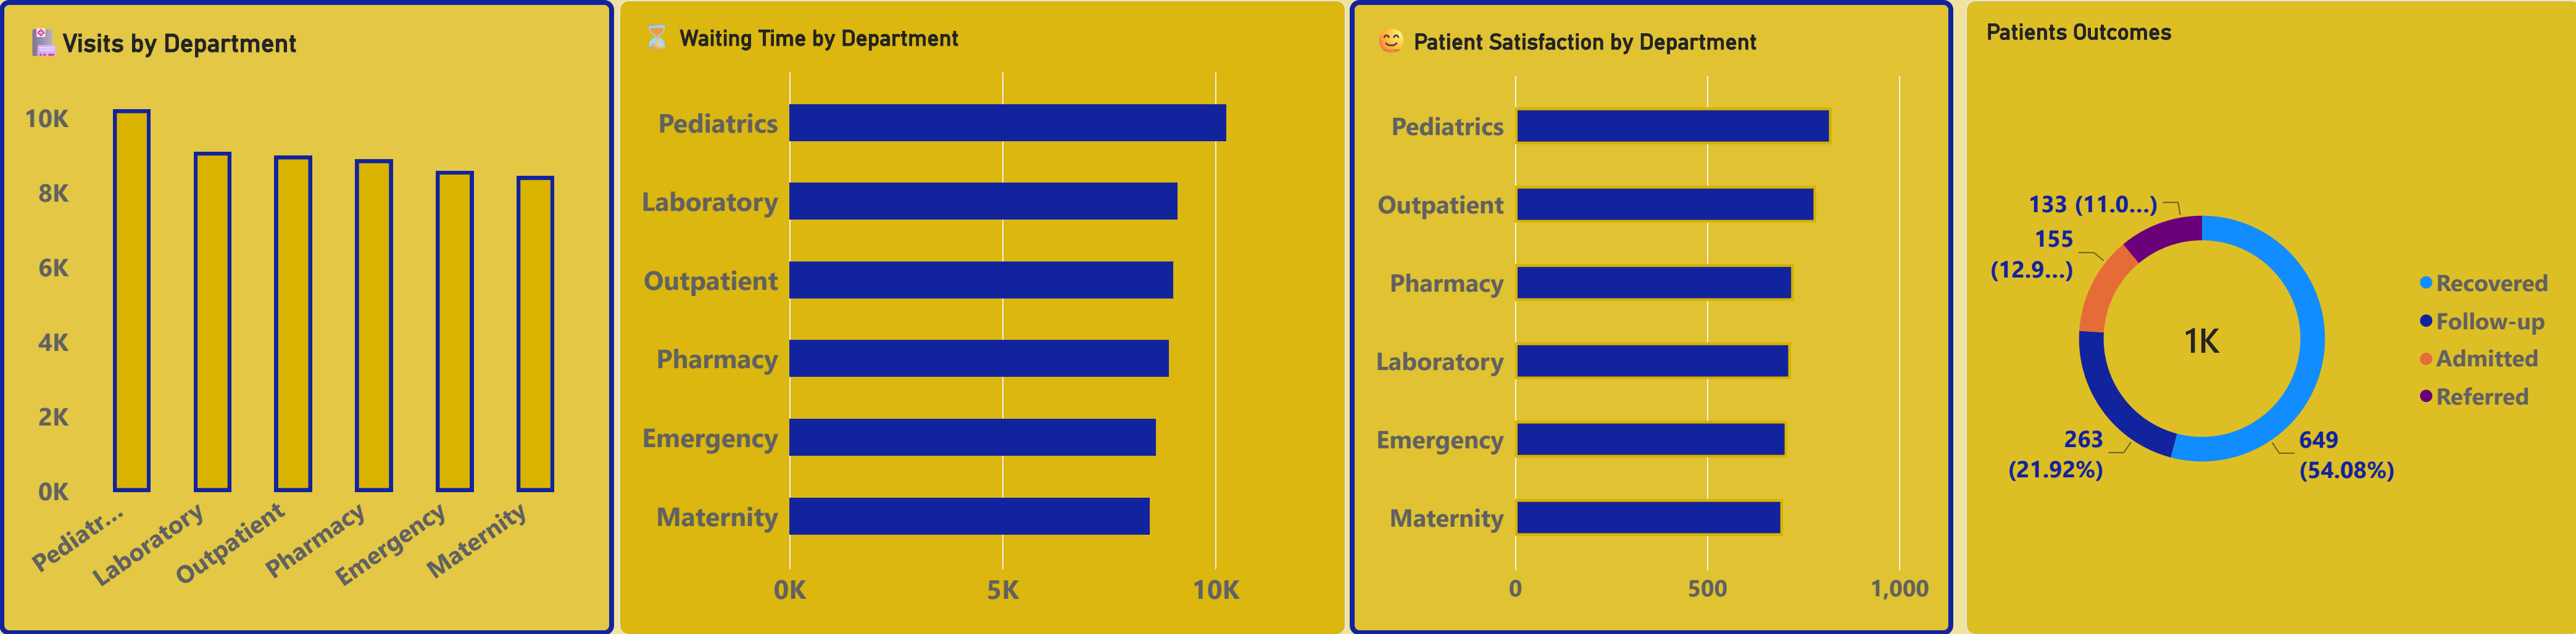

Waiting Efficiency: There seems to be a relationship between the number of visit and waiting time. A patient would be expected to wait most in the pediatric.

Department Experience:
Across all the department, patients are most satisfied with the Pediatrics department

Patient Outcomes: 58.08% Patients recovered after treatment. Impressive but we can do more.

Branch Performance:
Reveals differences in patient activity and service delivery across branches.

Patient Volume Trends:
August has the highest Patient

Revenue Target and Total Revenue

KEY INSIGHTS

- Revenue Leadership:** Rivers leads state-level revenue generation at **\$12.73M**, followed by Abuja.
- Top Department:** Pediatrics is the highest-performing department, generating **\$9.39M** in revenue.
- Leading Service:** Pediatric Care is the strongest revenue-generating service among the six services offered.
- Target Gap:** Significant differences between **state revenue targets and actual revenue** highlight the need to align financial expectations with performance.
- Pharmacy Review:** Pharmacy care and the Pharmacy department warrant further financial investigation to understand their relatively weaker revenue contribution.

PATIENT EXPERIENCE

Providing a clear view of patient experience by connecting satisfaction, waiting time, service location, and patient outcomes to identify opportunities for improving healthcare delivery.

Satisfaction Distribution by Department

Total Patients by Outcome

KEY INSIGHTS

★ **Overall Satisfaction:** Measures the organization's average patient experience.

🏠 **Department Experience:** Pharmacy offers the best satisfactions to patients, however, Maternity care is the lowest.

📍 **Branch Experience:** Nnewi offers Average Satisfaction Score (ASS) of 3.88, greater than the ASS of 3.71

🕒 **Waiting Experience:** Interestingly, Lekki branch with ASS of 3.60 has the lowest Average Waiting Time (AWT) of 40.65, showing no significant relationship between waiting time and satisfaction. The same is observed for department in relation to ASS and AWT.

❤️ **Patient Outcomes:** Results of patient care shows that 649 patients recovered after hospital care.

📊 **Satisfaction Distribution:** There is an increase in patient satisfaction, until around 3.0 where stability was archived, followed by a drop. However, score 5.0 has the highest number of patient with 70
